United Nations A/C.2/58/L.69

General Assembly

Distr.: Limited
10 December 2003

Original: English

Fifty-eighth session
Second Committee
Agenda item 91 (b)
Macroeconomic policy questions: science and technology for development

Draft resolution submitted by the Vice-Chairman of the Committee, Mr. Henri S. Raubenheimer (South Africa), on the basis of informal consultations held on draft resolution A/C.2/58/L.20

Science and technology for development

The General Assembly,

Recognizing the role that international cooperation on science and technology can play in addressing the technological gap and the digital divide between the North and the South,

Recognizing also the importance of North-South as well as South-South cooperation in the field of science and technology,

Recognizing further the vital role of new and emerging technologies in raising the productivity and competitiveness of nations and the need, inter alia, for capacity-building, measures promoting the transfer and diffusion of technologies to developing countries, and promotion of private sector activities and public awareness of science and technology,

Reaffirming the need to enhance the science and technology activities of the organizations of the United Nations system and the role of the Commission on Science and Technology for Development in providing policy guidance, in particular on issues of relevance to developing countries,

Recognizing the role of information and communication technologies in promoting development as an important step towards addressing the challenges of bridging the digital divide and, in this regard, welcoming the World Summit on the Information Society, to be held in Geneva in 2003 and Tunis in 2005,

Welcoming the Commission's selection of the substantive theme "Promoting the application of science and technology to meet the development goals[1] contained

[1] A/58/76.

03-64839 (E) 111203

in the United Nations Millennium Declaration", for its work during the intersessional period 2003-2004, as welcomed by the Economic and Social Council in its resolution 2003/56 of 24 July 2003,

Noting with appreciation the Commission's work during its intersessional period 2001-2003 on its theme "Technology development and capacity-building for competitiveness in a digital society", in particular the information and communication technologies development indices, which serve as an important contribution to the preparation of the World Summit on the Information Society,

Taking note of the report of the Secretary-General on the impact of new biotechnologies, with particular attention to sustainable development, including food security, health and economic productivity,[1]

Recalling Economic and Social Council resolution 2003/56, in which the Council invited the Commission to interact closely with the Information and Communication Technologies Task Force to promote greater information exchange and coordination of activities in the field of information and communication technologies in order to contribute to the World Summit on the Information Society,

1. *Urges* the relevant bodies of the United Nations system engaged in biotechnology to work cooperatively so as to ensure that countries receive sound scientific information and practical advice to enable them to take advantage of these technologies, as appropriate, to promote economic growth and development;

2. *Takes note* of the proposal of the Secretary-General for an integrated framework for biotechnology development within the United Nations system, as contained in his report on the impact of new biotechnologies, with particular attention to sustainable development, including food security, health and economic productivity,[1] and requests him to report further on the status of coordination between the relevant organizations and bodies of the United Nations system with a view to strengthening coordination of activities in the area of biotechnology, in particular in the promotion of biotechnology within the United Nations system;

3. *Also takes note* of the publication entitled *Information and Communication Technology Development Indices*[2] and invites the United Nations Conference on Trade and Development in collaboration with the Information and Communication Technologies Task Force and the International Telecommunication Union to update this publication as part of its contribution to the World Summit on the Information Society, recalling General Assembly resolution 56/183 of 21 December 2001 in which the Assembly encouraged effective contributions from and the active participation of all relevant United Nations bodies;

4. *Calls upon* the Secretary-General to continue to ensure that the Commission and its secretariat within the United Nations Conference on Trade and Development are provided with the necessary resources to enable it to better carry out its mandate;

5. *Requests* the Secretary-General to submit a report on the implementation of the present resolution to the General Assembly at its sixtieth session.
